

**STAFF ENVIRONMENTAL
SCIENTIST**

Permanent, Full-time Position
Salary: \$5,445-6,575

Do you want to help change California for the better? Make meaningful contributions to water policies that will guide California's development in the years to come? Do you relish learning about new scientific discoveries and trends? If so, we have an outstanding career opportunity you should know about.

The CALFED Science Program has an opening for a Staff Environmental Scientist to help our team as we synthesize cutting-edge science from exceptional minds and leading researchers throughout the nation to keep government policy makers fully informed on timely topics. The information we provide is used in setting state policies on climate change, water supply, ecosystem restoration, water quality, and more.

DUTIES INCLUDE BUT ARE NOT LIMITED TO:

- Using your water-resource expertise to analyze, synthesize, and communicate information gathered from multiple scientific disciplines integral to CALFED programs.
- Working with agencies, stakeholders, and the public to promote peer-reviewed science information/practices through projects, meetings, technical workshops, and symposia.
- Duties will be adjusted according to the classification.

QUALIFICATIONS INCLUDE BUT ARE NOT LIMITED TO:

- Knowledge of scientific disciplines related to water resource management, such as hydrology, climate change science, terrestrial ecology, or landscape ecology. (Required)
- Writing skills to produce clear, accurate and concise science-related articles for a variety of audiences. (Highly Desirable)
- B.S. or advanced degree in biological, chemical, physical, or environmental science, or water-related scientific discipline. (Required)

Visit our website for a detailed job description: http://www.calwater.ca.gov/calfed/HR/job_opportunities.html

WHO MAY APPLY:

- California state employees currently in the Staff Environmental Scientist classification
- Applicants currently reachable on a State list for a Staff Environmental Scientist position
- California state employees who have similar duties and qualifications described in the duty statement and who are at a similar salary level may be eligible for transfer to the Staff Environmental Scientist classification.

Submit a State application (Form STD. 678), resume, and cover letter to:

CALFED Bay-Delta Program - Human Resources - LD
650 Capitol Mall, 5th Floor
Sacramento, CA 95814
